Authentisign Brings a New Level of Convenience to Document Signing

Now you don't have to scramble all over town and coordinate multiple schedules to simply get legal signatures on your real estate documents. It's not only a time saver for you, your clients will appreciate the convenience as well. It's easy, legal, and the new way of doing business. FHA approved and ESIGN compliant, Authentisign uses "drop and drag" technology, allowing you to create "signing blocks" in three easy ways:

1. Add the signers to your document
2. Add the document
3. Mark where the signatures should go

That's it! The system will then automatically route the documents, gather the signatures and distribute the fully executed document(s) when all the signers have signed.

TransactionDesk - NEW VERSION
